Expression	Number Line Model	Tile Spacer Model
5. $-3 + 7$		
6. $3 + 7$		
7. $(-3) + (-7)$		
8. $3 + (-7)$		

9. Now that you have used models to add integers, is there a way to add integers without using a number line or tile spacers? Did you discover any patterns that you can use to make rules for adding integers?
